2 Synonym Sets

Word	Synonym	Nuance / Register Note
climate	weather	"Weather" is one day; "climate" is the long-term pattern.
damage	harm	"Harm" is for people/animals/health; "damage" is for objects.
disappear	vanish	"Vanish" is sudden; "disappear" is neutral.
effect	result	Very close in meaning; "effect" often follows "have a/an ... on".
endangered	threatened	"Threatened" is general; "endangered" is the official term for at-risk animals.
protect	save	"Save" is everyday; "protect" is more formal, often in laws.
reduce	cut down (on)	"Cut down (on)" is spoken; "reduce" is more formal.
renewable	sustainable	"Renewable" can be remade naturally; "sustainable" means it can last without running out.
waste	rubbish	"Rubbish" is solid waste; "waste" can include liquids and gases too.
wildlife	animals	"Animals" is broad, incl. pets; "wildlife" means wild ones only.

3 Antonyms

Word	Antonym	Note
damage	repair	To fix, not harm
disappear	appear	Direct
endangered	common	Not at risk
protect	destroy	Direct
reduce	increase	Direct
renewable	non-renewable	Eventually runs out

4 Word Formation

Verb	Noun	Adjective	Adverb
damage	damage	damaged	—
endanger	danger	endangered	—
pollute	pollution	polluted	—
protect	protection	protective	—
recycle	recycling	recycled	—
reduce	reduction	reduced	—

DID YOU KNOW? — The word "recycle" comes from "re-" (again) and "cycle" (circle) — it means to make something go around again instead of throwing it away.

5 Collocations

• protect the environment	• renewable energy
• cause pollution	• harm wildlife
• reduce waste	• clean water
• save energy	• global warming
• climate change	• throw away rubbish
• natural resources	• go to waste (idiom)
• endangered species	• make a difference (idiom)

FUN FACT — A single plastic bottle can take up to 450 years to break down in the environment.

6 Phrasal Verbs

Phrasal Verb	Meaning	Example
clean up	to remove dirt or rubbish from a place	Volunteers cleaned up the beach after the storm.
cut down (on)	to reduce the amount of something	Try to cut down on plastic bags when you go shopping.
give up	to stop doing something	Our family gave up single-use plastic bags last year.
run out (of)	to have no more of something left	Scientists warn that we could run out of clean water in some regions.
throw away	to get rid of something you no longer need	Don't throw away bottles — put them in the recycling bin.

7 Vocabulary Chain

HOW TO PLAY

In a circle or line, the first student says one sentence using a word from this unit. The next student must use a different unit word in a new sentence that connects logically to the one before it. Keep going around the group. You're out if you repeat a word already used, hesitate too long, or say a sentence that doesn't connect. Last student standing wins. Example chain: "Pollution is a big problem in cities." Then: "Pollution can damage people's health." Then: "To reduce the damage, factories must change." Then: "If they don't change, more animals will become endangered."

8 Debate Toolkit

A. Functional Language for Debating

Function	Phrase	Topic Example
Adding a point	*Also…*	Also, climate change is affecting wildlife around the world.
Agreeing	*I agree because…*	I agree because pollution is getting worse every year.
Asking for an opinion	*What do you think about…?*	What do you think about using more renewable energy?
Concluding	*In the end…*	In the end, we all need to help protect the environment.
Disagreeing	*I don't agree because…*	I don't agree because not everyone can afford renewable energy.
Giving a reason	*This is because…*	This is because factories produce a lot of pollution.
Giving an example	*For example…*	For example, some cities have already banned plastic bags.
Giving an opinion	*I think that…*	I think that everyone should recycle more at home.

B. Argument & Counter

Pick a position, then argue against it using the language above.

1. **A)** Recycling should be compulsory for every family, not just a personal choice.
   B) Recycling should stay a personal choice — the government should not force people.

2. **A)** Governments should completely ban plastic bags in shops.
   B) A complete ban is too difficult for small shops to follow straight away.

3. **A)** People should use bikes instead of cars to help reduce pollution.
   B) Not everyone can use a bike, especially in bad weather or over long distances.

4. **A)** Protecting endangered animals should be more important than building new roads.
   B) Sometimes a community needs new roads more urgently than it needs to protect animals.

9 Discussion Prompts

1. What can you do at home to help protect the environment?

2. Do you think climate change is a serious problem in your country? Why or why not?

3. Should companies have to pay a fine if they cause pollution?

4. What is one environmental problem you would like to solve, and how?

10 Context Passage

Five years ago, the river near our town was full of rubbish. Factories put dirty water into the river every day, and the fish slowly began to disappear. The water smelled bad, and nobody wanted to go near it anymore. Local people were worried about the pollution, but for a long time, nothing changed.

Then a group of students decided to act. They asked the local government for help and started a big clean-up project. Volunteers removed tons of rubbish from the riverbanks, and the factory agreed to stop releasing dirty water into the river. Slowly, the river became clean again, and the fish came back. It wasn't easy, and the town still has to protect the river every year, but it shows that people really can make a difference.

> **TRIVIA** — Rivers that are cleaned up successfully often see fish return within just a few years, showing how quickly nature can recover.

11 Quick Practice

Two exercises, five minutes each.

A. Matching — match each word to its definition.

1. pollution	a. to make something smaller or less
2. endangered	b. the general weather pattern of a place over many years
3. renewable	c. something useful or valuable found in nature
4. wildlife	d. to turn waste into something that can be used again
5. reduce	e. dirty or harmful substances in the air, water, or land
6. climate	f. at risk of disappearing completely
7. resource	g. able to be made again naturally, like solar or wind power
8. recycle	h. wild animals and plants living in their natural environment

B. Gap-fill — complete with a word from this unit (correct form).

1. Factories should _____ the amount of waste they produce.

2. Many animals are _____ because people are destroying their homes.

3. Solar and wind power are examples of _____ energy.

4. Air _____ is a serious problem in big cities.

5. We should always try to _____ paper, plastic, and glass.

6. The forest is home to a lot of _____, including birds and deer.

NON-NEGOTIABLES

By the end of this unit, these five should be automatic — no hesitation, no translating in your head: **endangered**, **pollution**, **protect**, **reduce**, **renewable**.

If any of these still feel unfamiliar, go back through the unit before moving on.

UNIT 2

4 Word Formation

Verb	Noun	Adjective	Adverb
achieve	achievement	achievable	—
challenge	challenge	challenging	—
encourage	encouragement	encouraging	—
focus	focus	focused	—
motivate	motivation	motivated	—
revise	revision	revised	—

DID YOU KNOW? — The word "curriculum" comes from Latin, where it originally meant "a running" or "a course to run" — like a racetrack. Over time, it came to mean a "course of study."

5 Collocations

• gain knowledge	• achieve a goal
• develop a skill	• focus on your studies
• favourite subject	• make progress
• sit an exam	• school curriculum
• revise for a test	• feel confident
• improve your grades	• a challenging task

FUN FACT — Studies show that reviewing new information a few times over several days helps you remember it much better than trying to memorise it all in one night.

6 Phrasal Verbs

Phrasal Verb	Meaning	Example
catch up (on)	to reach the same level as others after falling behind	He missed a week of school and had to catch up on his homework.
hand in	to give a piece of work to a teacher	Please hand in your essays by Friday.

write down	to record something in words	Write down the new vocabulary so you can revise it later.

7 60-Second Challenge

HOW TO PLAY

Challenge 1: a student has 60 seconds to argue for one side of a topic from this unit, using at least 4 unit words correctly. Challenge 2: the same student then has 60 seconds to argue the opposite side, using at least 4 different unit words. No long pauses and no repeating the same sentence pattern. Stop for more than ten seconds and you're out — pass to the next student.

8 Debate Toolkit

A. Functional Language for Debating

Function	Phrase	Topic Example
Adding a point	*On top of that…*	On top of that, too much homework can lower motivation.
Agreeing	*That's true because…*	That's true because students often learn more from practice than from memorising facts.
Asking for an opinion	*How do you feel about…?*	How do you feel about students choosing their own subjects?
Concluding	*To sum up…*	To sum up, a good curriculum should balance knowledge and skills.
Disagreeing	*I see it differently…*	I see it differently — exams help students focus and revise properly.
Giving a reason	*The reason is…*	The reason is that different students learn best in different ways.
Giving an example	*For instance…*	For instance, some schools now use projects instead of exams.
Giving an opinion	*In my opinion…*	In my opinion, exams put too much pressure on students.

B. Argument & Counter

Pick a position, then argue against it using the language above.

1. **A)** Homework should be reduced because it takes away free time.
   B) Homework helps students revise and remember what they learned in class.

2. **A)** Schools should let students choose more of their own subjects.
   B) A fixed curriculum makes sure every student learns the same important knowledge.

3. **A)** Exams are the best way to check what a student has learned.
   B) Exams often test memory more than real understanding or skill.

4. **A)** Teachers should focus more on encouraging students than on giving grades.
   B) Without grades, many students would lose motivation to work hard.

9 Discussion Prompts

1. What is the most challenging subject for you, and why?

2. Do you think exams are a fair way to test knowledge? Why or why not?

3. What helps you stay motivated when you are studying?

4. Should students be allowed to choose their own curriculum?

10 Context Passage

At the start of the school year, one student in our class found every subject challenging. Exams made her nervous, and she often forgot what she had memorised the night before. Her grades were poor, and she was slowly losing confidence in her own ability to learn.

Then her teacher encouraged her to change the way she revised. Instead of trying to memorise everything the night before a test, she began to focus on a little knowledge every day and write down the most important points. Slowly, her progress became clear. She started to achieve better results in her exams, and for the first time, she felt confident walking into the exam room. It wasn't about being naturally clever — it was about finding the right way to study.

TRIVIA — Research shows that writing notes by hand, rather than typing them, often helps students remember information better.

11 Quick Practice

Two exercises, five minutes each.

A. Odd One Out — circle the word that doesn't belong, and be ready to explain why.

1. confident motivated focused nervous
2. achieve succeed improve fail
3. revise memorise study forget
4. encourage motivate support discourage
5. curriculum subject exam holiday

B. Transformation — rewrite each sentence using the word in capitals in a different form, keeping the same meaning.

1. Our teacher gives us confidence and makes us want to try harder. (ENCOURAGEMENT)

---

2. She finally reached her goal after months of hard work. (ACHIEVEMENT)

---

3. This new project makes students want to work harder. (MOTIVATING)

---

4. The exam was very difficult and tested our full ability. (CHALLENGING)

---

5. Learning at school helps young people prepare for the future. (EDUCATION)

NON-NEGOTIABLES

By the end of this unit, these five should be automatic — no hesitation, no translating in your head: **achieve**, **confident**, **knowledge**, **motivate**, **revise**.

If any of these still feel unfamiliar, go back through the unit before moving on.

Word	Antonym	Note
artificial	natural	Direct
connect	disconnect	Direct
convenient	inconvenient	Direct
efficient	wasteful	Wastes time or resources
innovative	outdated	Old-fashioned, not new
reliable	unreliable	Direct

4 Word Formation

Verb	Noun	Adjective	Adverb
access	access	accessible	—
connect	connection	connected	—
develop	development	developed	—
innovate	innovation	innovative	—
invent	invention	inventive	—
rely	reliance	reliable	reliably

DID YOU KNOW? — The word "technology" comes from the Greek words techne ("skill" or "craft") and logia ("study of") — literally, "the study of skill."

5 Collocations

• invent a device	• develop a product
• modern technology	• reliable connection
• digital device	• convenient way
• upgrade a system	• update software
• connect to the internet	• artificial intelligence
• innovative idea	• efficient system

FUN FACT — The first computer "bug" was a real insect — a moth found stuck inside a computer in 1947, which is where the word "bug" for a computer error comes from.

6 Phrasal Verbs

Phrasal Verb	Meaning	Example
back up	to make a copy of computer information in case the original is lost	Always back up your files before updating the software.
plug in	to connect an electrical device to a power supply	The phone won't charge unless you plug it in properly.
set up	to prepare a piece of equipment so that it is ready to use	It took an hour to set up the new computer.
turn off	to make a machine or device stop working	Remember to turn off your laptop before you leave.
turn on	to make a machine or device start working	Can you turn on the printer before the meeting starts?

7 Word Auction

HOW TO PLAY

Split the class into 2–3 teams, each starting with 20 points. Read a unit word aloud; teams secretly decide how many points to bid for it. The highest bidder must use the word correctly in a sentence within 10 seconds. Correct, and they keep the word; wrong, and the points are lost anyway — the word goes back into the auction. The team with the most correctly-used words wins, not the team with the most points left.

8 Debate Toolkit

A. Functional Language for Debating

Function	Phrase	Topic Example
Adding a point	*Besides that…*	Besides that, new technology can also create new kinds of jobs.
Agreeing	*I agree, especially because…*	I agree, especially because devices today are far more reliable than before.
Asking for an opinion	*What's your view on…?*	What's your view on using artificial intelligence in schools?
Concluding	*Overall…*	Overall, innovative technology brings both benefits and risks.
Disagreeing	*I'm not sure about that…*	I'm not sure about that — not everyone can access new technology equally.
Giving a reason	*That's because…*	That's because many people still cannot afford digital devices.
Giving an example	*A good example is…*	A good example is how smartphones connect people across the world.
Giving an opinion	*I believe…*	I believe technology makes life easier for most people.

B. Argument & Counter

Pick a position, then argue against it using the language above.

1. **A)** Schools should give every student access to a digital device.
   B) Devices in the classroom often distract students more than they help them learn.

2. **A)** New technology always makes life more convenient.
   B) Some new technology is unreliable and causes more problems than it solves.

3. **A)** Artificial intelligence will make many jobs more efficient.
   B) Artificial intelligence could replace jobs that people currently depend on.

4. **A)** People should upgrade their devices as soon as new technology is available.
   B) Constantly upgrading devices is expensive and creates unnecessary waste.

9 Discussion Prompts

1. What piece of technology could you not live without, and why?

2. Do you think new technology always makes life better? Why or why not?

3. What is the most useful device you have ever used?

4. Should every student have access to a computer or tablet at school?

10 Context Passage

A small bakery in our neighbourhood used to write down every order by hand. It worked, but it wasn't efficient — orders were sometimes lost, and the owner spent hours every evening checking numbers with a pen and paper.

Last year, the owner decided to try new technology. She bought a simple device that let customers order online, and she installed reliable software to track sales automatically. At first, she found it hard to update her old habits, but soon the new system became far more convenient than the paper method ever was. Orders connected directly to the kitchen, mistakes became rare, and she had more free time in the evenings. It wasn't a perfect solution — the software needed regular updates, and technical problems still happened sometimes — but overall, the innovative change made her small business far more efficient.

> **TRIVIA** — Studies show that small businesses using simple digital tools often save several hours a week compared to keeping records on paper.

11 Quick Practice

Two exercises, five minutes each.

A. Matching — match each word to its definition.

1. device	a. not natural, made by people
2. reliable	b. the right or chance to use something
3. convenient	c. programs that make a computer work
4. efficient	d. using new methods or ideas
5. artificial	e. a machine made for a particular purpose
6. access	f. able to be trusted
7. software	g. easy to use or suited to your plans
8. innovative	h. working well without wasting time or energy

B. Gap-fill — complete with a word from this unit (correct form).

1. Doctors now use _____ technology to detect illness earlier.

2. You need to _____ your phone to the Wi-Fi before you can go online.

3. This new washing machine is much more _____ than our old one — it uses far less water.

4. Scientists _____ a new device to measure air pollution.

5. Many rural areas still don't have _____ to fast internet.

6. The company plans to _____ its software next month to fix several bugs.

NON-NEGOTIABLES

By the end of this unit, these five should be automatic — no hesitation, no translating in your head: **device**, **efficient**, **invent**, **reliable**, **technology**.

If any of these still feel unfamiliar, go back through the unit before moving on.

8 Debate Toolkit

A. Functional Language for Debating

Function	Phrase	Topic Example
Adding a point	*What's more…*	What's more, a computer virus can spread through email very quickly.
Agreeing	*I agree, mainly because…*	I agree, mainly because a strong password keeps our data safe.
Asking for an opinion	*Would you agree that…?*	Would you agree that everyone should learn to protect their own data?
Concluding	*In short…*	In short, staying safe online is now a basic skill.
Disagreeing	*I don't really agree…*	I don't really agree — most people forget complicated passwords.
Giving a reason	*This is mainly because…*	This is mainly because more of our lives now happen online.
Giving an example	*One example is…*	One example is how schools now use email to contact parents.
Giving an opinion	*From my point of view…*	From my point of view, everyone should use a secure password.

B. Argument & Counter

Pick a position, then argue against it using the language above.

1. **A)** Schools should teach students how to create a secure password.
   B) Most students already know enough about passwords from using apps and games.

2. **A)** Everyone should back up their files regularly.
   B) Cloud storage already backs up files automatically, so this is unnecessary extra work.

3. **A)** People should never download software from a website they don't know.
   B) Many small but useful programs only exist on lesser-known websites.

4. **A)** Companies should be allowed to email customers as much as they want.
   B) Too many emails make people ignore even the important ones.

9 Discussion Prompts

1. How do you keep your passwords secure?

2. Have you ever lost a file because you forgot to make a backup? What happened?

3. Do you think schools should teach students about computer viruses and online safety?

4. What is your favourite website, and why do you use it so often?

10 Context Passage

Last year, a student in our class lost all his coursework two days before an important deadline. His laptop suddenly stopped working, and none of his files would open. He had never made a backup, so months of work disappeared in a moment.

After that, he changed the way he worked. He started saving every important file to an online folder, and he set a secure password to protect his account. He also installed antivirus software, just in case a virus was part of the problem. Now, whenever he finishes an assignment, he uploads a copy immediately instead of waiting until the end of the week. It seems like a small habit, but for him, it made a big difference — losing his work once was enough to teach him how important a simple backup can be.

TRIVIA — Studies suggest that most people don't back up their files until after they've lost something important at least once.

11 Quick Practice

Two exercises, five minutes each.

A. Odd One Out — circle the word that doesn't belong, and be ready to explain why.

1. password username secure virus
2. download upload install delete
3. file folder program email
4. secure safe protected risky
5. network website browser backup

B. Transformation — rewrite each sentence using the word in capitals in a different form, keeping the same meaning.

1. He put the new software onto his computer. (INSTALLATION)

_____

2. This website keeps your information safe. (SECURE)

_____

3. Writing computer instructions is her job. (PROGRAMMING)

_____

4. You can get this app from the internet for free. (DOWNLOADABLE)

_____

5. Always make an extra copy of your important files. (BACKUP)

_____

NON-NEGOTIABLES

By the end of this unit, these five should be automatic — no hesitation, no translating in your head: **backup**, **download**, **install**, **password**, **secure**.

If any of these still feel unfamiliar, go back through the unit before moving on.

7 Word Tennis

HOW TO PLAY

Two students face off. One states a sentence using a unit word on the unit's topic; the other must respond within 10 seconds with a new sentence using a different unit word that logically continues it. Repeat a word, pause too long, or break the topic — you're out, and the next challenger steps in.

8 Debate Toolkit

A. Functional Language for Debating

Function	Phrase	Topic Example
Adding a point	*Not only that, but…*	Not only that, but a poor diet can also affect your energy levels.
Agreeing	*That's a fair point because…*	That's a fair point because stress can affect both the body and the mind.
Asking for an opinion	*Where do you stand on…?*	Where do you stand on schools teaching students about mental health?
Concluding	*All things considered…*	All things considered, a healthy lifestyle needs both physical and mental care.
Disagreeing	*I have to disagree…*	I have to disagree — not every illness needs medical treatment straight away.
Giving a reason	*This is largely because…*	This is largely because many people don't get enough sleep.
Giving an example	*Take, for example…*	Take, for example, how regular exercise can reduce stress.
Giving an opinion	*As I see it…*	As I see it, mental health should be treated as seriously as physical health.

B. Argument & Counter

Pick a position, then argue against it using the language above.

1. **A)** Schools should teach students how to manage stress.
   B) Parents, not schools, should be responsible for teaching this.

2. **A)** Regular exercise should be part of every school day.
   B) Not every student enjoys sport, and forcing exercise could put some students off it completely.

3. **A)** People should always see a doctor as soon as symptoms appear.
   B) Many minor illnesses get better on their own without any treatment.

4. **A)** Getting enough sleep is more important than getting enough exercise.
   B) Both sleep and exercise matter equally, and neither should be seen as more important.

9 Discussion Prompts

1. What do you usually do to relax after a stressful day?

2. Do you think people your age get enough sleep? Why or why not?

3. What is one habit you could change to improve your health?

4. Should mental health be talked about as openly as physical health?

10 Context Passage

For most of last year, one of our neighbours worked long hours and rarely had time to relax. He often felt tired, and small problems at work left him feeling more stressed than they probably should have. He told himself this was normal — just part of having a busy life.

After a bad cold that took weeks to fully recover from, his doctor suggested a few small changes: more sleep, regular exercise, and short breaks during the day. At first, it felt like a waste of time. But after a month of a more balanced routine, his energy levels improved, and he found it easier to relax in the evenings. He still works just as hard, but now he treats his physical and mental health as part of the job, not something extra he has no time for.

> **TRIVIA** — Doctors recommend that most teenagers get between eight and ten hours of sleep a night — more than most adults need.

11 Quick Practice

Two exercises, five minutes each.

A. Matching — match each word to its definition.

Giving an example	*A clear example is…*	A clear example is how flexible deadlines can reduce workplace stress.
Giving an opinion	*Personally, I feel…*	Personally, I feel a good salary matters less than job satisfaction.

B. Argument & Counter

Pick a position, then argue against it using the language above.

1. **A)** Experience matters more than qualifications when hiring someone.
   B) Qualifications prove a minimum standard that experience alone cannot guarantee.

2. **A)** Employees should be able to resign at any time without giving a reason.
   B) Employers need enough notice to find a replacement and avoid disruption.

3. **A)** A good salary is the most important part of any job.
   B) Job satisfaction and a healthy workplace matter more than salary in the long run.

4. **A)** Deadlines should always be strict, with no exceptions.
   B) Some flexibility with deadlines leads to better quality work and less stress.

8 Debate Roulette

HOW TO PLAY

Number the Argument & Counter statements above. Randomly assign a number to a student — they must argue that position for 30 seconds, even if it isn't their real opinion. Optional: a second student instantly argues the counter.

9 Discussion Prompts

1. What is more important to you: salary or job satisfaction? Why?

2. Have you ever had to meet a difficult deadline? How did you manage it?

3. What qualities make someone a good employer?

4. Would you rather have one long career or several different careers in your life?

10 Context Passage

Two years ago, one of my cousins applied for a job she didn't think she was qualified for. She had the right experience, but she didn't have all the qualifications listed in the advert, and she almost didn't apply at all. In the end, she decided the interview was worth trying, even if nothing came of it.

To her surprise, the employer offered her the job. Her manager later told her that they hired people based on attitude and experience, not just qualifications on paper. She worked hard, met every deadline, and got along well with her colleagues. Within a year, she was promoted to a more responsible position in the same company. She still says the biggest lesson she learned was that she almost missed the opportunity simply because she doubted herself before the interview even began.

TRIVIA — Surveys consistently show that having a good relationship with colleagues is one of the biggest factors in how happy people feel at work.

11 Quick Practice

Two exercises, five minutes each.

A. Odd One Out — circle the word that doesn't belong, and be ready to explain why.

1. employer employee colleague deadline
2. apply interview resign promote
3. salary qualification deadline experience
4. responsible qualified experienced careless
5. career job workplace resign

B. Transformation — rewrite each sentence using the word in capitals in a different form, keeping the same meaning.

1. She sent a letter asking for the job. (APPLICATION)

---

2. He was given a more important job at the company. (PROMOTED)

---

3. The factory gives work to over 500 people. (EMPLOYMENT)

---

4. You need the right skills and training to do this job. (QUALIFICATIONS)

---

5. She told her boss she was leaving the company. (RESIGNATION)

NON-NEGOTIABLES

By the end of this unit, these five should be automatic — no hesitation, no translating in your head: **apply**, **career**, **employer**, **experience**, **job**.

If any of these still feel unfamiliar, go back through the unit before moving on.

Giving an example	*Look at how…*	Look at how small companies compete with big brands by focusing on one product.
Giving an opinion	*In my view…*	In my view, a strong brand matters more than a low price.

B. Argument & Counter

Pick a position, then argue against it using the language above.

1. **A)** Small companies should focus on one product instead of many.
   B) Offering several products helps a company survive if one product fails.

2. **A)** A company should always choose the cheapest supplier to keep costs down.
   B) Choosing based on price alone can lead to poor quality and lost customers.

3. **A)** Every department in a company should manage its own budget.
   B) Central control of the budget makes it easier to plan for the whole company.

4. **A)** Businesses should invest heavily in advertising to build their brand.
   B) Money is often better spent improving the product itself.

9 Discussion Prompts

1. Would you rather work for a large company or a small one? Why?

2. What makes you a loyal customer of a brand?

3. If you had a small budget to start a business, what product would you sell?

4. What decisions do you think are hardest for a manager to make?

10 Context Passage

A small local bakery used to compete directly with a large supermarket chain that sold cheaper bread nearby. For a while, the bakery lost customers every month, and the owner began to wonder whether the business could survive at all.

Instead of trying to match the supermarket's prices, the owner changed her strategy. She focused the budget on a smaller range of high-quality products instead of trying to sell everything. She also invested in getting to know her regular customers by name. Within a year, profit had slowly started to grow again, not because she had beaten the competition on price, but because she had stopped trying to. Her decision to manage the business differently, rather than simply compete harder, turned out to be exactly what the bakery needed.

> **TRIVIA** — Studies show that small businesses which focus on a narrow range of products often survive longer than those that try to compete on every front.

11 Quick Practice

Two exercises, five minutes each.

A. Matching — match each word to its definition.

1. profit	a. businesses competing in the same market
2. budget	b. to put money into something hoping to make a profit
3. customer	c. a part of an organisation dealing with one area
4. strategy	d. a choice made after thinking about the options
5. competition	e. money made after costs are paid
6. invest	f. a plan for how money will be spent
7. department	g. a person who buys goods or a service
8. decision	h. a plan used to achieve something

B. Gap-fill — complete with a word from this unit (correct form).

1. The company set a strict _____ for this year's advertising.

2. It's hard for a small business to compete with such strong _____.

3. Every _____ in the company has its own manager.

4. She decided to _____ her savings in a new business.

5. The shop's regular _____ know the owner by name.

6. A clear _____ helped the team focus on their main goal.

NON-NEGOTIABLES

By the end of this unit, these five should be automatic — no hesitation, no translating in your head: **budget**, **company**, **customer**, **manage**, **profit**.

If any of these still feel unfamiliar, go back through the unit before moving on.

7 Debate Toolkit

A. Functional Language for Debating

Function	Phrase	Topic Example
Adding a point	*Besides…*	Besides, prison can sometimes make reoffending more likely, not less.
Agreeing	*That's a good point because…*	That's a good point because harsh punishment doesn't always reduce crime.
Asking for an opinion	*What would you say about…?*	What would you say about giving lighter sentences to young offenders?
Concluding	*In the end…*	In the end, justice should protect both victims and society.
Disagreeing	*I'm not sure I agree…*	I'm not sure I agree — some crimes deserve strict punishment.
Giving a reason	*This is partly because…*	This is partly because many young offenders can still change.
Giving an example	*Take the case of…*	Take the case of a first-time offender who steals out of desperation.
Giving an opinion	*As far as I'm concerned…*	As far as I'm concerned, prison should focus on rehabilitation, not just punishment.

B. Argument & Counter

Pick a position, then argue against it using the language above.

1. **A)** Prison sentences should be longer for serious crimes.
   B) Longer sentences don't always stop people from committing crimes again.

2. **A)** Young offenders should be treated differently from adult criminals.
   B) If the crime is serious, age shouldn't matter as much as the harm caused.

3. **A)** Eyewitness evidence should always be trusted in court.
   B) Witnesses can make mistakes, so evidence like fingerprints or video is more reliable.

4. **A)** Communities should be told when a former prisoner moves nearby.
   B) This could make it harder for someone to rebuild their life after prison.

8 Flip the Statement

HOW TO PLAY

Pick any Argument (A) from the Argument & Counter section above. The student must argue the Counter (B) position convincingly, on the spot, without reading the printed counter.

9 Discussion Prompts

1. Do you think prison is the best punishment for every type of crime?

2. Have you ever witnessed something and had to describe what happened? What was it like?

3. What punishment do you think fits a crime like stealing from a shop?

4. Should young people who commit a crime be punished the same way as adults?

10 Context Passage

A shopkeeper once accused a young man of stealing a jacket from his store. There was no real evidence — just a suspicion — but the police were called, and the young man was questioned for hours. He kept saying he was innocent, but nobody seemed to believe him.

Then a witness came forward. She had been standing outside the shop the whole time and had seen exactly what happened: the young man had simply forgotten to pay before answering his phone outside. Without her evidence, he might have faced serious punishment for a crime he never committed. The case reminds us why the justice system depends so heavily on solid evidence, not just suspicion — and why witnesses matter so much in deciding what really happened.

> **TRIVIA** — In many countries, a person cannot legally be found guilty of a crime unless the evidence proves it beyond reasonable doubt.

11 Quick Practice

Two exercises, five minutes each.

A. Odd One Out — circle the word that doesn't belong, and be ready to explain why.

1. judge jury witness thief
2. steal arrest punish forgive
3. guilty innocent honest punished
4. prison court law victim
5. evidence proof witness opinion

B. Transformation — rewrite each sentence using the word in capitals in a different form, keeping the same meaning.

1. Someone took her bike without permission. (THEFT)

_____

2. The police caught the man they were looking for. (ARRESTED)

_____

3. The court decided that he had broken the law. (JUDGMENT)

_____

4. He had to go to prison because of what he did. (PUNISHMENT)

_____

5. She said that he had taken the money, but she had no proof. (ACCUSATION)

_____

NON-NEGOTIABLES

By the end of this unit, these five should be automatic — no hesitation, no translating in your head: **arrest**, **crime**, **guilty**, **innocent**, **steal**.

If any of these still feel unfamiliar, go back through the unit before moving on.

justice	fairness	"Fairness" is the everyday word; "justice" is the more formal, legal term.
lawyer	attorney	"Attorney" is the more formal term, especially in American English.
sentence	punishment	"Punishment" is the general word; "sentence" is the specific one given by a judge in court.
testify	give evidence	Same meaning, but "give evidence" is the everyday phrase used instead of the more formal single verb.

3 Antonyms

Word	Antonym	Note
appeal	accept	To accept a court's decision instead of asking for it to be changed
defendant	plaintiff	Not a true opposite, but the two contrasting sides in a legal case
justice	injustice	Direct
legal	illegal	Direct
sue	settle	To resolve a disagreement without going to court, instead of suing
testify	stay silent	To say nothing in court instead of speaking as a witness

4 Word Formation

Verb	Noun	Adjective	Adverb
appeal	appeal	appealing	—
contract	contract	contractual	—
legalise	legality	legal	legally
rule	rule	—	—
sentence	sentence	—	—
testify	testimony	—	—

DID YOU KNOW? — The word "verdict" comes from the Latin phrase vere dictum, meaning "truly spoken" — a reminder that a jury's decision is meant to state the truth.

5 Collocations

• break the law	• reach a verdict
• a fair trial	• file an appeal
• sign a contract	• testify in court
• hire a lawyer	• sue for damages
• pass a sentence	• bring someone to justice
• pay a fine	• a legal right

FUN FACT — In some countries, jury members are chosen at random from the local population — a shop worker and a company director could sit on the very same jury.

6 Phrasal Verbs

Phrasal Verb	Meaning	Example
get off (with)	to avoid punishment, or receive a lighter one	He got off with a small fine.
let off	to not punish someone, or not punish them severely	The judge let him off with a warning.

7 Speed Interview

HOW TO PLAY

One student is the interviewee. Classmates take turns asking questions that must include a unit word; the interviewee must also answer using a unit word each time. Run for 2 minutes, then switch interviewee.

8 Debate Toolkit

A. Functional Language for Debating

Function	Phrase	Topic Example
Adding a point	*On top of that…*	On top of that, a good lawyer can make a real difference to the result of a trial.
Agreeing	*I'd support that view because…*	I'd support that view because a fair trial protects everyone, even people we dislike.
Asking for an opinion	*What's your take on…?*	What's your take on suing someone instead of settling privately?
Concluding	*To wrap up…*	To wrap up, justice depends on fair rules and fair people to apply them.
Disagreeing	*I'm not convinced…*	I'm not convinced — a heavy fine doesn't stop a rich company from breaking the law again.
Giving a reason	*The main reason is…*	The main reason is that a defendant is innocent until proven guilty.
Giving an example	*Look at how…*	Look at how one appeal can completely change a court's verdict.
Giving an opinion	*In my view…*	In my view, the law should punish white-collar crime as harshly as street crime.

B. Argument & Counter

Pick a position, then argue against it using the language above.

1. **A)** Every defendant should have the right to a lawyer, even if they cannot pay for one.
   B) Free lawyers cost the public money that could be spent elsewhere.

2. **A)** Judges should give harsher sentences to reduce crime.
   B) Harsher sentences do not always stop people from breaking the law.

3. **A)** People should always be allowed to appeal a court's decision.
   B) Too many appeals slow down justice for everyone else.

4. **A)** A company that breaks the law should be sued, not just fined.
   B) A fine is faster and cheaper than a long court case.

9 Discussion Prompts

1. Do you think a fine is ever a fair punishment for a serious crime?

2. Would you want to be a lawyer? Why or why not?

3. Should everyone have the right to appeal a court's decision?

4. What makes a trial fair, in your opinion?

10 Context Passage

A small shop owner once found a stranger's wallet on the pavement outside her store. Instead of keeping the cash inside, she called the police, who traced the wallet back to its owner, an elderly man who had dropped it that morning.

A month later, the man discovered that a different shop nearby had sold him faulty goods and refused to give him his money back. He didn't want to sue the shop — he simply wanted an apology and his money returned. His lawyer suggested a simpler path: writing a formal letter explaining his rights under the contract, rather than starting a long legal battle. The shop responded within a week, refunded the money, and apologised. Not every disagreement needs a trial or a verdict; sometimes justice is just people agreeing to do the right thing.

> **TRIVIA** — The idea of a fair trial is centuries old — England's Magna Carta of 1215 declared that no free man could be punished except by the lawful judgment of his equals.

11 Quick Practice

Two exercises, five minutes each.

A. Matching — match each word to its definition.

1. verdict	a. a legal agreement between two people or groups

7 Vocabulary Chain

HOW TO PLAY

In a circle or line, the first student says one sentence using a word from this unit. The next student must use a different unit word in a new sentence that connects logically to the one before it. Keep going around the group. You're out if you repeat a word already used, hesitate too long, or say a sentence that doesn't connect. Last student standing wins. Example chain: "The journalist wrote an article about the election." Then: "The article was published on the front page." Then: "The front page influenced how people voted." Then: "That kind of influence worries some readers."

8 Debate Toolkit

A. Functional Language for Debating

Function	Phrase	Topic Example
Adding a point	*On top of that…*	On top of that, some advertisements are designed to look like real news articles.
Agreeing	*I'd support that view because…*	I'd support that view because a single headline can shape what millions of people believe.
Asking for an opinion	*What's your take on…?*	What's your take on governments censoring the news during a crisis?
Concluding	*To wrap up…*	To wrap up, good journalism depends on reliable sources and honest coverage.
Disagreeing	*I'm not convinced…*	I'm not convinced — readers should check more than one source before believing a story.
Giving a reason	*The main reason is…*	The main reason is that a free press helps people make informed decisions.
Giving an example	*Look at how…*	Look at how quickly a rumour can spread once it goes online.
Giving an opinion	*In my view…*	In my view, social media has too much influence over young people.

B. Argument & Counter

Pick a position, then argue against it using the language above.

1. **A)** Governments should be allowed to censor the media during a national crisis.
   B) Censorship, even in a crisis, makes it easier to hide the truth from the public.

2. **A)** Social media gives ordinary people more influence than newspapers ever did.
   B) Trained journalists check facts in a way most social media posts never do.

3. **A)** Advertisements aimed at children should be banned completely.
   B) Banning advertisements would not stop children from wanting popular products.

4. **A)** The media should always publish a story as soon as they have it.
   B) Rushing to publish makes it more likely that a rumour is reported as fact.

9 Discussion Prompts

1. Do you trust the news you read online? Why or why not?

2. Would you want to be a journalist? Why or why not?

3. How much influence do you think advertisements really have on what people buy?

4. Should there ever be censorship of the media?

10 Context Passage

A local radio station once received a tip from an anonymous caller claiming that a nearby factory was secretly dumping waste into the river. The young journalist who took the call was excited — it sounded like exactly the kind of story that would make the headlines.

But before rushing to publish anything, her editor reminded her of one rule: never broadcast a claim you cannot confirm. So instead of putting the story straight on air, she spent two days checking records, visiting the site, and speaking to other sources. It turned out the caller's information was only half right — there was a leak, but it was accidental, not secret. Her careful reporting still made the front page, and this time, nobody could accuse the station of spreading a rumour instead of the truth.

> **TRIVIA** — The Reuters news agency began in 1850 when Paul Julius Reuter used a fleet of trained carrier pigeons to fly stock prices between Brussels and Aachen — faster than the train.

11 Quick Practice

Two exercises, five minutes each.

A. Odd One Out — circle the word that doesn't belong, and be ready to explain why.

1. journalist editor source audience

Agreeing	*I'd support that view because…*	I'd support that view because a strong artistic heritage gives a country real identity.
Asking for an opinion	*What's your take on…?*	What's your take on schools cutting art classes to save money?
Concluding	*To wrap up…*	To wrap up, talent matters, but without inspiration it rarely becomes a masterpiece.
Disagreeing	*I'm not convinced…*	I'm not convinced — not every tradition deserves to be kept just because it's old.
Giving a reason	*The main reason is…*	The main reason is that creative subjects teach skills that exams cannot measure.
Giving an example	*Look at how…*	Look at how a single exhibition can completely change how people see an artist.
Giving an opinion	*In my view…*	In my view, every city should invest in free museums and galleries.

B. Argument & Counter

Pick a position, then argue against it using the language above.

1. **A)** Art and music classes are just as important as science and maths.
   B) Schools have limited time, and core academic subjects should come first.

2. **A)** Museums and galleries should always be free to enter.
   B) Entry fees help museums maintain and protect valuable artworks.

3. **A)** Modern art is just as valuable as classical art.
   B) Some modern art relies on shock value rather than real skill or talent.

4. **A)** Cultural traditions should be preserved exactly as they have always been.
   B) Traditions naturally change over time, and that change keeps them alive.

9 Discussion Prompts

1. Do you think you have any creative talent? What is it?

2. Should art classes be compulsory in school? Why or why not?

3. What is one tradition from your culture that you think is important to keep?

4. Have you ever been inspired by a painting, film, or performance? What was it?

10 Context Passage

A teenager once joined an after-school art club only because her friend didn't want to go alone. She had never thought of herself as creative, and she assumed she had no real talent for painting. For the first few weeks, she mostly copied whatever the student next to her was doing.

One afternoon, the teacher brought in photographs of an exhibition from a local gallery and asked the class to paint something inspired by their own culture instead of copying an example. With nothing to copy, the teenager painted a scene from a family tradition she had never really thought about before. It wasn't a masterpiece, but it was the first painting that felt like it was truly hers. Her teacher entered it into a small student exhibition at the museum downtown, and for the first time, she understood why people said art could be a kind of performance of who you are.

> **TRIVIA** — The Mona Lisa, one of the most famous paintings in the world, measures only about 77 by 53 centimetres — visitors to the Louvre are often surprised at how small it really is.

11 Quick Practice

Two exercises, five minutes each.

7 Word Auction

HOW TO PLAY

Split the class into 2-3 teams, each starting with 20 points. Read a unit word aloud; teams privately bid points to claim it. The highest bidder must use the word correctly in a sentence within 10 seconds. Correct, and they keep the word; wrong, and the points are lost anyway — the word returns to auction. The team with the most correctly-used words wins, not the team with the most points left.

8 Debate Toolkit

A. Functional Language for Debating

Function	Phrase	Topic Example
Adding a point	*On top of that…*	On top of that, a good design has to work well, not just look good.
Agreeing	*I'd support that view because…*	I'd support that view because a strong concept makes a design easier to recognise.
Asking for an opinion	*What's your take on…?*	What's your take on companies constantly following the latest design trends?
Concluding	*To wrap up…*	To wrap up, the best designs balance function and aesthetic appeal.
Disagreeing	*I'm not convinced…*	I'm not convinced — a beautiful design means little if it isn't functional.
Giving a reason	*The main reason is…*	The main reason is that a prototype lets you fix mistakes before mass production.
Giving an example	*Look at how…*	Look at how a simple change in colour can completely change the style of a room.
Giving an opinion	*In my view…*	In my view, symmetry makes most designs feel more calming and balanced.

B. Argument & Counter

Pick a position, then argue against it using the language above.

1. **A)** Good design should always put function before appearance.
   B) Appearance matters too — people are drawn to products that look good.

2. **A)** Companies should follow design trends to stay competitive.
   B) Chasing trends can make a brand look like it has no real style of its own.

3. **A)** Every product should be tested as a prototype before it goes on sale.
   B) Prototyping takes time and money that small companies may not have.

4. **A)** Symmetry and balance always create the most pleasing designs.
   B) Some of the most memorable designs are deliberately uneven or unusual.

9 Discussion Prompts

1. Do you prefer functional design or beautiful design? Can you have both?

2. What is one product you think has a really good design? Why?

3. Would you rather test a rough prototype or wait for the finished product?

4. Do you follow design trends, or do you prefer a style that never changes?

10 Context Passage

A small furniture company once spent months arguing over the design of a new chair. One half of the team wanted something simple and purely functional; the other half wanted a bold shape that would stand out in any room. Neither side would agree, and the project nearly stopped completely.

Eventually, someone suggested building two rough prototypes instead of choosing on paper: one plain and practical, one with an unusual, eye-catching shape. Customers who tried both said the bold design looked more exciting in photos, but the simple one was far more comfortable and easier to live with. The final design borrowed from both — a clean, functional shape with just one unusual curve that gave it a bit of style. It became the company's best-selling chair, proof that good design often comes from testing ideas, not just arguing about them.

TRIVIA — The golden ratio, approximately 1.618, has been used by designers and architects for centuries because objects and buildings built with this proportion are often seen as especially pleasing to the eye.

11 Quick Practice

Two exercises, five minutes each.

A. Odd One Out — circle the word that doesn't belong, and be ready to explain why.

1. design sketch prototype trend
2. pattern texture concept material
3. functional practical useful aesthetic
4. symmetry shape layout texture
5. style fashion look colour

B. Transformation — rewrite each sentence using the word in capitals in a different form, keeping the same meaning.

1. The building was made only to be useful, without much thought for how it looked. (FUNCTION)

---

2. The two sides of the poster matched each other exactly. (SYMMETRY)

---

3. The furniture was carefully planned to look modern and simple. (DESIGN)

---

4. Many people found the bright colours pleasing to look at. (AESTHETIC)

---

5. Her clothes always look fashionable and put together. (STYLE)

NON-NEGOTIABLES

By the end of this unit, these five should be automatic — no hesitation, no translating in your head: **concept**, **design**, **functional**, **prototype**, **style**.

If any of these still feel unfamiliar, go back through the unit before moving on.

8 Debate Toolkit

A. Functional Language for Debating

Function	Phrase	Topic Example
Adding a point	*On top of that…*	On top of that, a good guide can make an ordinary trip feel unforgettable.
Agreeing	*I'd support that view because…*	I'd support that view because a clear itinerary saves a lot of wasted time abroad.
Asking for an opinion	*What's your take on…?*	What's your take on packing light instead of bringing lots of luggage?
Concluding	*To wrap up…*	To wrap up, tourism helps local economies, but it needs to be managed carefully.
Disagreeing	*I'm not convinced…*	I'm not convinced — planning every excursion in advance can take the adventure out of travel.
Giving a reason	*The main reason is…*	The main reason is that a valid passport and enough local currency prevent a lot of stress.
Giving an example	*Look at how…*	Look at how one delayed arrival can change an entire itinerary.
Giving an opinion	*In my view…*	In my view, sightseeing alone teaches you less than talking to local people.

B. Argument & Counter

Pick a position, then argue against it using the language above.

1. **A)** Tourists should always plan a detailed itinerary before travelling.
   B) Leaving room for spontaneous plans often leads to the best travel memories.

2. **A)** Popular destinations should limit the number of tourists allowed each year.
   B) Limiting tourists would hurt local businesses that depend on visitor spending.

3. **A)** Buying souvenirs supports the local economy and should be encouraged.
   B) Many souvenirs are mass-produced and provide little real benefit to local communities.

4. **A)** It's better to reserve accommodation in advance.
   B) Booking on arrival can mean better last-minute deals and more flexibility.

9 Discussion Prompts

1. What is the best souvenir you have ever brought back from a trip?

2. Would you rather travel with a detailed itinerary or with no plan at all?

3. What is your favourite way to travel: by plane, train, car, or something else?

4. Have you ever had a problem with luggage, a delayed departure, or a missed connection?

10 Context Passage

A young couple once planned every hour of their honeymoon down to the last detail: flights, accommodation, a full sightseeing itinerary, even restaurant reservations for every night. On their first morning, heavy rain cancelled the boat excursion they had booked, and the carefully planned schedule fell apart within hours.

With no real plan for the rest of the day, they wandered into a small local market instead, bought a strange-looking souvenir neither of them could name, and ended up sharing lunch with a shopkeeper who insisted on being their unofficial guide for the afternoon. It became the story they told most often when they got home — not the reserved restaurants or the perfect itinerary, but the one day nothing went to plan. They still keep that souvenir on a shelf, a reminder that the best part of a destination is rarely the part you can book in advance.

TRIVIA — France remains the most visited country in the world, welcoming a record 102 million international tourists in 2025.

7 Word Tennis

HOW TO PLAY

Two students face off. One states a sentence using a unit word on the unit's topic; the other must respond within 10 seconds with a new sentence using a different unit word that logically continues it. Repeat a word, pause too long, or break the topic — you're out, and the next challenger steps in.

8 Debate Toolkit

A. Functional Language for Debating

Function	Phrase	Topic Example
Adding a point	*On top of that…*	On top of that, a strong community can support people through difficult times.
Agreeing	*I'd support that view because…*	I'd support that view because trust is the foundation of every strong relationship.
Asking for an opinion	*What's your take on…?*	What's your take on staying loyal to old friends even as you grow apart?
Concluding	*To wrap up…*	To wrap up, respect and trust matter more in a relationship than never disagreeing.
Disagreeing	*I'm not convinced…*	I'm not convinced — a little conflict can actually make a friendship stronger, not weaker.
Giving a reason	*The main reason is…*	The main reason is that each generation tends to see relationships a little differently.
Giving an example	*Look at how…*	Look at how a single act of loyalty can change a whole friendship.
Giving an opinion	*In my view…*	In my view, a good neighbour is just as important as a good friend.

B. Argument & Counter

Pick a position, then argue against it using the language above.

1. **A)** Siblings usually have a stronger bond than friends.
   B) Some friendships last longer and matter more than relationships with siblings.

2. **A)** People should always support their family, even when they disagree.
   B) Blind loyalty to family can sometimes mean supporting someone who is wrong.

3. **A)** Online communities can be just as meaningful as local ones.
   B) Face-to-face relationships build trust in a way that online ones cannot.

4. **A)** It's normal and healthy for close friends to grow apart over time.
   B) Real friendship means making the effort to stay close, no matter what.

9 Discussion Prompts

1. Who is someone you really look up to, and why?

2. Do you think it is possible to stay close friends with someone as you grow older?

3. What makes a good neighbour, in your opinion?

4. Is it ever right to support a family member even when you think they are wrong?

10 Context Passage

Two neighbours lived side by side for over a decade without ever becoming close. They were polite but distant, exchanging little more than a nod at the gate. Then one winter, a bad storm knocked out the power on their street for three days.

With no heating and no way to cook, the older of the two neighbours knocked on the other's door with a pot of soup, and the younger one brought over candles and a battery radio. What started as simple support during an emergency slowly grew into a real friendship. They still don't agree on everything, and they've had the occasional small conflict over noise or parking, but the trust they built during those three cold days never went away. Sometimes it takes a crisis to turn a stranger into someone you can rely on.

> **TRIVIA** — The longest marriage ever recorded lasted 88 years and 349 days, between David Jacob Hiller and Sarah Davy Hiller, who married in Canada in 1809.

11 Quick Practice

Two exercises, five minutes each.

A. Odd One Out — circle the word that doesn't belong, and be ready to explain why.

1. relationship bond connection stranger
2. neighbour sibling friend community
3. trust respect loyalty conflict
4. marriage commitment friendship generation
5. support respect trust betrayal

B. Transformation — rewrite each sentence using the word in capitals in a different form, keeping the same meaning.

1. She made a firm promise to visit her grandmother every week. (COMMITMENT)

2. The two neighbours often disagreed loudly about the shared fence. (CONFLICT)

3. The two women have stayed close for over twenty years. (FRIENDSHIP)

4. The dog always stayed close and never left her owner's side, even in danger. (LOYALTY)

5. Everyone in the village treated the old teacher very politely because of all she had done. (RESPECT)

NON-NEGOTIABLES

By the end of this unit, these five should be automatic — no hesitation, no translating in your head: **bond**, **commitment**, **generation**, **relationship**, **trust**.

If any of these still feel unfamiliar, go back through the unit before moving on.

B. Argument & Counter

Pick a position, then argue against it using the language above.

1. **A)** Personality is mostly shaped by genetics, not experience.
   B) Life experience and environment shape personality just as much as genes do.

2. **A)** Talking to a therapist should be as normal as visiting a doctor.
   B) Not every problem needs professional therapy — some people cope better through friends and family.

3. **A)** Trusting your instincts is usually the right approach.
   B) Careful thinking leads to better decisions than instinct alone.

4. **A)** Social media has made young people more anxious than previous generations.
   B) Every generation has faced its own sources of anxiety — social media is just the latest one.

8 Debate Roulette

HOW TO PLAY

Number the Argument & Counter statements above. Randomly assign a number to a student — they must argue that position for 30 seconds, even if it isn't their real opinion. Optional: a second student instantly argues the counter.

9 Discussion Prompts

1. Do you think you have good instincts? Can you give an example?

2. What is one habit you would like to change, and why?

3. How do you usually calm down when you feel anxious?

4. Do you think empathy can be taught, or is it something you either have or you don't?

10 Context Passage

A university student once dreaded every group presentation. Her hands would shake, her mind would go blank, and afterwards she would spend hours replaying every mistake. Her instinct was always to avoid signing up early, hoping someone else would go first.

In her final year, a professor noticed her pattern and gently pointed out that her reaction wasn't really about public speaking — it was an old habit of anxiety that had built up since school. With a bit of awareness and a few sessions of therapy, she started paying attention to her own thoughts before each talk instead of just reacting to them. Her personality didn't change overnight, and she never became someone who loved the spotlight. But she learned to calm down before walking to the front of the room, and that was enough. Sometimes changing your mindset doesn't remove the fear completely — it just makes it possible to walk through it anyway.

> **TRIVIA** — Russian physiologist Ivan Pavlov famously trained dogs to salivate at the sound of a bell alone, after repeatedly ringing it before feeding them — a discovery of classical conditioning that later won him a Nobel Prize.

11 Quick Practice

Two exercises, five minutes each.

A. Matching — match each word to its definition.

1. empathy	a. treatment for mental or physical illness without an operation

7 Synonym Swap

HOW TO PLAY

Read a sentence containing a basic or weak word aloud. Students race to replace it with the best-fitting synonym from the unit's Synonym Sets table. Whoever answers first must justify why their word fits the register or context better than the basic word.

8 Debate Toolkit

A. Functional Language for Debating

Function	Phrase	Topic Example
Adding a point	*On top of that…*	On top of that, low voter turnout weakens the whole idea of democracy.
Agreeing	*I'd support that view because…*	I'd support that view because real reform needs strong public pressure behind it.
Asking for an opinion	*What's your take on…?*	What's your take on politicians who change their policy positions before an election?
Concluding	*To wrap up…*	To wrap up, a healthy democracy depends on informed and active citizens, not just leaders.
Disagreeing	*I'm not convinced…*	I'm not convinced — a loud protest doesn't always represent what most citizens actually want.
Giving a reason	*The main reason is…*	The main reason is that voting is the clearest way ordinary citizens can hold a government to account.
Giving an example	*Look at how…*	Look at how one election campaign can completely change the direction of a policy.
Giving an opinion	*In my view…*	In my view, every citizen has a duty to vote, even when no candidate seems perfect.

B. Argument & Counter

Pick a position, then argue against it using the language above.

1. **A)** Voting should be compulsory for every citizen.
   B) Forcing people to vote goes against the basic idea of free choice in a democracy.

2. **A)** Politicians should be allowed to serve for as many terms as voters choose to elect them.
   B) Limiting how long a politician can stay in power protects against too much authority in one place.

3. **A)** Public protest is an essential and healthy part of democracy.
   B) Protests can disrupt public life and sometimes achieve less than working through official channels.

4. **A)** Governments should raise taxes to fund stronger public services.
   B) Higher taxes leave people with less money to spend and can slow the economy.

9 Discussion Prompts

1. Do you think voting should be compulsory? Why or why not?

2. Would you ever want to be a politician? Why or why not?

3. What is one policy you would introduce if you were in government?

4. Have you ever taken part in or supported a protest or campaign?

10 Context Passage

A small town once argued for months over a new tax that would pay for repairing its old bridge. Half the citizens supported the reform, saying the bridge was unsafe. The other half protested loudly at every town meeting, insisting the tax was unfair to families who barely used the bridge at all.

When local elections came around, two candidates ran with opposite promises: one built her whole campaign around building the new bridge quickly, the other promised to scrap the tax completely. It was the closest election the town had ever had, decided by fewer than twenty votes. The winning candidate didn't get everything she wanted from parliament straight away, and the new policy took years to fully take effect. But looking back, most citizens agreed on one thing: arguing about it in public, however messy, had been better than leaving the decision to somebody else.

> **TRIVIA** — Iceland's parliament, the Althing, was founded in 930 AD and is considered the oldest continuously running parliament in the world — over a thousand years old.

7 Debate Toolkit

A. Functional Language for Debating

Function	Phrase	Topic Example
Adding a point	*On top of that…*	On top of that, refusing to negotiate usually makes a dispute last much longer.
Agreeing	*I'd support that view because…*	I'd support that view because strong alliances make countries safer, not weaker.
Asking for an opinion	*What's your take on…?*	What's your take on using sanctions instead of military action?
Concluding	*To wrap up…*	To wrap up, most tension between countries is eventually solved through negotiation, not conflict.
Disagreeing	*I'm not convinced…*	I'm not convinced — sanctions often hurt ordinary citizens more than the government they target.
Giving a reason	*The main reason is…*	The main reason is that a skilled diplomat can prevent a small dispute from becoming a bigger conflict.
Giving an example	*Look at how…*	Look at how one summit meeting can completely change the relationship between two countries.
Giving an opinion	*In my view…*	In my view, every country has a responsibility to help refugees fleeing war.

B. Argument & Counter

Pick a position, then argue against it using the language above.

1. **A)** Countries should always negotiate before considering sanctions or military action.
   B) Some situations are too urgent for slow negotiation and need a faster response.

2. **A)** Every country has a duty to accept refugees fleeing war.
   B) Countries cannot be expected to accept unlimited numbers of refugees at once.

3. **A)** Strong alliances between countries make the world safer.
   B) Alliances can drag countries into conflicts that were never really their own.

4. **A)** Economic sanctions are an effective way to pressure a government to change.
   B) Sanctions often hurt ordinary citizens far more than the leaders they are meant to pressure.

8 Flip the Statement

HOW TO PLAY

Pick any Argument (A) from the Argument & Counter section above. The student must argue the Counter (B) position convincingly, on the spot, without reading the printed counter.

9 Discussion Prompts

1. Do you think sanctions are an effective way to solve international disputes?

2. Would you ever want to work as a diplomat or ambassador? Why or why not?

3. What makes two countries strong allies, in your opinion?

4. Do you think countries should have more open or more controlled borders?

10 Context Passage

Two neighbouring countries once argued for years over a small stretch of border land that neither side really needed. Tension grew every time a new leader was elected, and each side accused the other of breaking old agreements. Ordinary citizens on both sides of the border stopped trusting their neighbours entirely.

Eventually, both governments agreed to send diplomats to a neutral country to negotiate, rather than let the dispute drag on any longer. The talks were slow, and more than once both sides threatened to pull out completely. But after months of quiet negotiation, they signed a treaty that split the land fairly and set up a joint committee to handle future disagreements. It didn't erase decades of tension overnight, but for the first time in years, families on both sides of the border could cross freely to visit each other again.

TRIVIA — The Treaty of Windsor, signed between England and Portugal in 1386, is the oldest diplomatic alliance still in force anywhere in the world — over 600 years old.

11 Quick Practice

Two exercises, five minutes each.

A. Matching — match each word to its definition.

1. treaty	a. an important meeting between leaders of two or more governments
2. ambassador	b. the building where a country's officials work in another country

4 Word Formation

Verb	Noun	Adjective	Adverb
consume	consumer	—	—
demand	demand	—	—
distribute	distribution	—	—
export	export	—	—
import	import	—	—
supply	supply	—	—

DID YOU KNOW? — The word "commerce" comes from the Latin com- ("together") and merx ("merchandise") — the same Latin root that gave us "merchant" and "market."

5 Collocations

• a peace treaty	• a retail store
• foreign trade	• export goods
• consumer demand	• import taxes
• a reliable supplier	• annual revenue
• a business transaction	• a local merchant
• wholesale prices	• the distribution network

FUN FACT — The Silk Road, an ancient network of trade routes stretching about 6,400 kilometres between China and Europe, carried silk, spices, and ideas between civilisations for over a thousand years.

7 Speed Interview

HOW TO PLAY

One student is the interviewee. Classmates take turns asking questions that must include a unit word; the interviewee must also answer using a unit word each time. Run for 2 minutes, then switch interviewee.

8 Debate Toolkit

A. Functional Language for Debating

Function	Phrase	Topic Example
Adding a point	*On top of that…*	On top of that, a reliable supplier can make or break a small business.
Agreeing	*I'd support that view because…*	I'd support that view because import taxes protect local jobs, at least in the short term.
Asking for an opinion	*What's your take on…?*	What's your take on buying from local merchants instead of large retail chains?
Concluding	*To wrap up…*	To wrap up, healthy trade depends on both strong supply and real consumer demand.
Disagreeing	*I'm not convinced…*	I'm not convinced — wholesale prices don't always get passed on fairly to the consumer.
Giving a reason	*The main reason is…*	The main reason is that a single unreliable supplier can disrupt an entire distribution chain.
Giving an example	*Look at how…*	Look at how one popular product can completely change demand for an entire industry.
Giving an opinion	*In my view…*	In my view, countries should export more of what they produce best.

B. Argument & Counter

Pick a position, then argue against it using the language above.

1. **A)** Countries should limit imports to protect local businesses.
   B) Limiting imports usually raises prices and gives consumers less choice.

2. **A)** Small, local merchants deserve more support than large retail chains.
   B) Large retailers often offer lower prices, which matters most to many consumers.

3. **A)** Businesses should always buy from the cheapest supplier available.
   B) Choosing suppliers based on price alone can hurt quality and reliability.

4. **A)** Online shopping is replacing retail stores for good.
   B) Many consumers still prefer to see and try goods in person before buying.

9 Discussion Prompts

1. Do you prefer buying from small local merchants or large retail stores?

2. Would you rather work in wholesale, retail, or import-export? Why?

3. What is one product you think is always worth the money, no matter the price?

4. Do you think countries should limit what they import? Why or why not?

10 Context Passage

A small family bakery once relied on a single flour supplier who had worked with them for twenty years. When that supplier suddenly raised prices, the owners faced a difficult choice: pay more, switch to a cheaper wholesale supplier they didn't know, or raise their own prices and risk losing consumers.

They decided to try something different. Instead of importing cheaper flour from further away, they found a smaller local merchant who could match the old price if the bakery agreed to buy in bulk. It wasn't a perfect solution — demand for their bread was seasonal, and storing extra goods meant new costs. But the transaction worked out well for both sides, and the bakery's revenue actually grew that year, helped by customers who liked buying from a business that supported other small local trade instead of a distant, faceless supplier.

TRIVIA — The world's oldest continuously operating company is Kongo Gumi, a Japanese construction business founded in 578 AD — over 1,400 years ago.

11 Quick Practice

Two exercises, five minutes each.

A. Odd One Out — circle the word that doesn't belong, and be ready to explain why.

1. export import trade consumer
2. wholesale retail merchant commerce
3. supplier merchant consumer distribution
4. revenue transaction demand supply
5. goods products merchandise trade

B. Transformation — rewrite each sentence using the word in capitals in a different form, keeping the same meaning.

1. People who buy and use products should have more legal protection. (CONSUMER)

2. Many more people wanted the new phone than the company expected. (DEMAND)

3. The company sends its products to stores all over the country. (DISTRIBUTE)

4. The factory sends most of its furniture to buyers in other countries. (EXPORT)

5. The shop brings in most of its coffee beans from South America. (IMPORT)

NON-NEGOTIABLES

By the end of this unit, these five should be automatic — no hesitation, no translating in your head: **commerce**, **demand**, **export**, **import**, **trade**.

If any of these still feel unfamiliar, go back through the unit before moving on.

3 Antonyms

Word	Antonym	Note
debt	savings	Money set aside, instead of money owed to someone else
deficit	surplus	Direct
growth	decline	Direct
poverty	wealth	Direct
recession	boom	Direct
unemployment	employment	Direct

4 Word Formation

Verb	Noun	Adjective	Adverb
grow	growth	—	—
—	inflation	inflationary	—
invest	investment	—	—
—	poverty	poor	—
employ	unemployment	unemployed	—
—	wealth	wealthy	—

DID YOU KNOW? — The word "wealth" comes from the Old English wela, meaning "well-being" — it was originally about a person's overall welfare, not just money, formed on the same pattern as the word "health."

5 Collocations

• economic growth	• interest rates
• high inflation	• a living wage
• in recession	• extreme poverty
• rising unemployment	• national wealth
• a budget deficit	• a foreign investment
• a trade surplus	• a bank loan

FUN FACT — The world's first stock exchange opened in Amsterdam in 1602, after the Dutch East India Company became the first company in history to sell shares to the public.

7 Vocabulary Chain

HOW TO PLAY

In a circle or line, the first student says one sentence using a word from this unit. The next student must use a different unit word in a new sentence that connects logically to the one before it. Keep going around the group. You're out if you repeat a word already used, hesitate too long, or say a sentence that doesn't connect. Last student standing wins. Example chain: "The country fell into a deep recession." Then: "Recession usually leads to rising unemployment." Then: "Unemployment can push families into poverty." Then: "The government introduced new loans to help fight poverty."

8 Debate Toolkit

A. Functional Language for Debating

Function	Phrase	Topic Example
Adding a point	*On top of that…*	On top of that, high inflation hits low-income families hardest of all.
Agreeing	*I'd support that view because…*	I'd support that view because steady economic growth usually leads to lower unemployment.
Asking for an opinion	*What's your take on…?*	What's your take on governments borrowing money to fight a recession?
Concluding	*To wrap up…*	To wrap up, a healthy economy depends on more than just rising wages.
Disagreeing	*I'm not convinced…*	I'm not convinced — a growing economy doesn't always mean less poverty for ordinary people.
Giving a reason	*The main reason is…*	The main reason is that high interest rates make loans more expensive for everyone.
Giving an example	*Look at how…*	Look at how quickly a budget surplus can turn into a deficit during a crisis.
Giving an opinion	*In my view…*	In my view, reducing poverty should matter more to governments than economic growth alone.

B. Argument & Counter

Pick a position, then argue against it using the language above.

1. **A)** Governments should always aim for a balanced budget, not a deficit.
   B) A deficit can be a useful tool to support the economy during a recession.

2. **A)** A country's success should be measured by its economic growth.
   B) Growth means little if wealth is not shared and poverty remains high.

3. **A)** Raising the minimum wage helps reduce poverty.
   B) A higher minimum wage can lead some businesses to reduce jobs.

4. **A)** People should save as much as possible instead of taking out loans.
   B) A loan can be a smart way to invest in your future, such as education.

9 Discussion Prompts

1. Do you think a country can grow its economy while also reducing poverty?

2. Would you rather save up for something or take out a loan? Why?

3. How would you explain inflation to someone who had never heard of it?

4. Do you think governments handle recessions well? Why or why not?

10 Context Passage

A small town's only factory closed during a national recession, and unemployment in the area tripled within a year. Many families who had never struggled with debt before suddenly found themselves falling behind on loan payments, and local shops that depended on factory workers' wages began closing too.

A few years later, a foreign company saw an opportunity: wages in the town were low, and the local government offered tax breaks to attract investment. The company built a new plant, and slowly the local economy began to bounce back. Unemployment fell, incomes rose, and the town even started running a small budget surplus for the first time in a decade. It wasn't the growth anyone had planned for, and not every family recovered the wealth they'd lost — but for a town that had spent years in poverty, it was enough to start saving up for the future again.

TRIVIA — The economist Simon Kuznets invented GDP (Gross Domestic Product) in the 1930s to help measure the US economy during the Great Depression — and later warned that it should never be used to judge a nation's overall well-being.

11 Quick Practice

Two exercises, five minutes each.

A. Matching — match each word to its definition.

1. deficit	a. the number of people without a job
2. surplus	b. money paid regularly for a job
3. recession	c. the state of being very poor
4. inflation	d. putting money into something to make a profit
5. unemployment	e. when spending is more than income
6. wage	f. an amount left over after needs are met
7. poverty	g. a period when the economy is doing badly
8. investment	h. a continuing rise in prices

B. Gap-fill — complete with a word from this unit (correct form).

1. The country fell into _____ after years of slow growth.

2. Rising prices caused by _____ made everyday goods more expensive.

3. The government reported a budget _____ of two billion dollars.

4. Many families struggled to escape _____ during the crisis.

5. She took out a _____ to help pay for university.

6. His salary is much higher than the national average _____.

NON-NEGOTIABLES

By the end of this unit, these five should be automatic — no hesitation, no translating in your head: **economy**, **growth**, **inflation**, **poverty**, **wealth**.

If any of these still feel unfamiliar, go back through the unit before moving on.

UNIT 20

Science & Discovery

1 Core Vocabulary

#	Word	Definition	Example
1	**breakthrough** *n.*	An important discovery or development that helps solve a problem	Scientists announced a major breakthrough in cancer treatment.
2	**chemical** *n.*	A basic substance that is used in chemistry or produced by a chemical process	The factory produces chemicals used in cleaning products.
3	**discovery** *n.*	An occasion when someone discovers something	The discovery of the new planet surprised astronomers.
4	**experiment** *n.*	A test, especially a scientific one, that you do in order to learn something or discover if something is true	The students carried out a simple experiment in class.
5	**formula** *n.*	A set of letters, numbers, or symbols that are used to express a mathematical or scientific rule	She wrote the chemical formula on the board.
6	**genetic** *adj.*	Relating to genes, the parts of cells which control particular characteristics	The disease is caused by a genetic condition.
7	**hypothesis** *n.*	An idea or explanation of something that is based on a few known facts but has not yet been proved to be true	Her hypothesis was that the plant would grow faster in sunlight.
8	**invention** *n.*	Something that has been designed or created for the first time	The telephone was a remarkable invention.
9	**laboratory** *n.*	A room used for scientific work	The samples were sent to a laboratory for testing.
10	**microscope** *n.*	A piece of scientific equipment that uses lenses to make very small objects look bigger so that they can be studied	They examined the cells under a microscope.
11	**observation** *n.*	The act of watching someone or something carefully	Careful observation showed that the birds returned every spring.
12	**research** *n.*	Detailed study of a subject in order to discover new information	The university received funding for medical research.
13	**scientist** *n.*	Someone who studies science or works in science	A team of scientists worked on the project for years.
14	**species** *n.*	A group of plants or animals that share similar characteristics	This species is only found on one island.
15	**theory** *n.*	An idea or set of ideas that is intended to explain something	Darwin's theory of evolution changed the study of biology.

2 Synonym Sets

Word	Synonym	Nuance / Register Note
breakthrough	advance	"Advance" is more general progress; "breakthrough" specifically means a sudden, important discovery.
discovery	finding	"Finding" is often used for the result of research; "discovery" can also describe finding something completely new.
experiment	test	"Test" is the everyday word; "experiment" is the more formal scientific term.
invention	creation	"Creation" is broader and can apply to art or ideas; "invention" specifically means something made for the first time.
observation	monitoring	"Monitoring" suggests ongoing, repeated watching; "observation" can be a single act of careful watching.
research	investigation	"Investigation" often implies searching for the truth about something specific; "research" is broader, detailed study.
theory	concept	"Concept" is a general idea; "theory" specifically explains why something happens, often tested by evidence.

3 Antonyms

Word	Antonym	Note
breakthrough	setback	A problem that causes delay, instead of an important step forward
discovery	concealment	Hiding something, instead of finding it
hypothesis	certainty	Something known to be true, instead of an untested idea
invention	imitation	Copying something that already exists, instead of creating something new
observation	neglect	Failing to pay attention to something, instead of watching it carefully
theory	practice	Direct

4 Word Formation

Verb	Noun	Adjective	Adverb
discover	discovery	—	—
experiment	experiment	experimental	experimentally
hypothesise	hypothesis	hypothetical	—
invent	invention	—	—
observe	observation	observational	—
research	research	—	—

DID YOU KNOW? — The word "hypothesis" comes from the Greek hupothesis, meaning "foundation" — from hupo ("under") and thesis ("placing"), the idea you place under a theory before it is proven.

5 Collocations

• a scientific breakthrough	• careful observation
• a controlled experiment	• under a microscope
• a working hypothesis	• an endangered species
• a leading scientist	• a laboratory test
• chemical formula	• a scientific theory
• genetic research	• a major discovery

FUN FACT — Penicillin, the world's first antibiotic, was discovered entirely by accident in 1928, when Alexander Fleming noticed that a mould growing on a forgotten petri dish had killed the bacteria around it.

6 Phrasal Verbs

Phrasal Verb	Meaning	Example
break through	to force a way past something that is holding you back	It took years before researchers broke through and found a treatment.
figure out	to finally understand something, or find the solution to a problem	It took the team months to figure out why the experiment kept failing.
find out	to get information about something because you want to know more about it	Researchers are trying to find out how the disease spreads.
point out	to tell someone about something, often because you think they have not noticed it	The professor pointed out a flaw in the hypothesis.
work on	to spend time repairing or improving something	She has been working on the same experiment for two years.

7 60-Second Challenge

HOW TO PLAY

Challenge 1: a student has 60 seconds to argue a position on the unit's topic, using at least 4 unit words correctly. Challenge 2: the same student then has 60 seconds to argue the opposite position, using at least 4 different unit words. No long pauses and no repeating a sentence structure. Stall for more than ten seconds and you're out — pass to the next student.

8 Debate Toolkit

A. Functional Language for Debating

Function	Phrase	Topic Example
Adding a point	*On top of that…*	On top of that, a single careful observation can sometimes lead to a huge breakthrough.
Agreeing	*I'd support that view because…*	I'd support that view because testing a hypothesis properly takes real patience and careful research.
Asking for an opinion	*What's your take on…?*	What's your take on genetic research being used to prevent disease?
Concluding	*To wrap up…*	To wrap up, even the strongest scientific theory can be questioned by new evidence.
Disagreeing	*I'm not convinced…*	I'm not convinced — not every scientific discovery is used responsibly once it leaves the laboratory.
Giving a reason	*The main reason is…*	The main reason is that an experiment has to be repeated many times before scientists can trust it.
Giving an example	*Look at how…*	Look at how one accidental observation in a laboratory led to a major medical breakthrough.
Giving an opinion	*In my view…*	In my view, every student should get the chance to carry out a real experiment at school.

B. Argument & Counter

Pick a position, then argue against it using the language above.

1. **A)** Scientific research should always be shared freely with the public.
   B) Some research needs to stay private, at least until it can be checked carefully.

2. **A)** Studying rare or endangered species should be a global priority.
   B) Limited research funding should focus on problems that directly affect human lives.

3. **A)** Every major scientific breakthrough begins with a simple hypothesis.
   B) Many important discoveries actually happen completely by accident.

4. **A)** Genetic research will solve some of humanity's biggest problems.
   B) Genetic research raises serious ethical questions that are just as important as the science.

9 Discussion Prompts

1. If you could make one scientific discovery, what would it be?

2. Do you think all scientific research is a good idea? Why or why not?

3. Would you rather work as a scientist in a laboratory or out in the field observing nature?

4. What is the most surprising scientific fact you know?

10 Context Passage

A university student once spent an entire summer running the same experiment over and over, testing a simple hypothesis about how plants respond to different colours of light. Most of her results were unremarkable, and by August she was ready to give up and call the whole project a failure.

While cleaning up her laboratory equipment on the last day, she noticed something odd in one forgotten tray of seedlings that had been left under a broken lamp by mistake. The plants had grown in a completely unexpected pattern, unrelated to her original hypothesis entirely. Curious, she spent another two weeks on a fresh set of observations, and what started as a mistake turned into the most interesting finding of her whole research project. It wasn't the discovery she had planned to make, but as her professor pointed out, some of science's most useful breakthroughs happen exactly that way.

> **TRIVIA** — Marie Curie remains the only person in history to win Nobel Prizes in two different sciences — Physics in 1903 and Chemistry in 1911.

A. Odd One Out — circle the word that doesn't belong, and be ready to explain why.

1. experiment hypothesis theory scientist
2. laboratory microscope formula chemical
3. discovery invention breakthrough observation
4. species genetic microscope chemical
5. research observation experiment invention

B. Transformation — rewrite each sentence using the word in capitals in a different form, keeping the same meaning.

1. Scientists found a completely new species of frog deep in the rainforest. (DISCOVERY)

_____

2. The students tested their idea carefully in the lab. (EXPERIMENT)

_____

3. She guessed the plant would grow faster in sunlight, but wasn't sure yet. (HYPOTHESIS)

_____

4. He created a brand new machine that had never existed before. (INVENTION)

_____

5. The scientist watched the animals carefully for several months. (OBSERVATION)

7 Word Auction

HOW TO PLAY

Split the class into 2-3 teams, each starting with 20 points. Read a unit word aloud; teams privately bid points to claim it. The highest bidder must use the word correctly in a sentence within 10 seconds. Correct, and they keep the word; wrong, and the points are lost anyway — the word returns to auction. The team with the most correctly-used words wins, not the team with the most points left.

8 Debate Toolkit

A. Functional Language for Debating

Function	Phrase	Topic Example
Adding a point	*On top of that…*	On top of that, learning to cook a few simple recipes builds real independence.
Agreeing	*I'd support that view because…*	I'd support that view because good hygiene in the kitchen prevents most food-related illness.
Asking for an opinion	*What's your take on…?*	What's your take on paying more for organic food?
Concluding	*To wrap up…*	To wrap up, a balanced diet matters more day to day than any single meal choice.
Disagreeing	*I'm not convinced…*	I'm not convinced — cutting out entire food groups isn't always necessary for good nutrition.
Giving a reason	*The main reason is…*	The main reason is that portion size affects health just as much as what you actually eat.
Giving an example	*Look at how…*	Look at how one strong flavour can completely change a simple dish.
Giving an opinion	*In my view…*	In my view, schools should teach students basic nutrition alongside cooking skills.

B. Argument & Counter

Pick a position, then argue against it using the language above.

1. **A)** Schools should teach students to cook a few basic recipes before they graduate.
   B) Cooking classes take time away from other subjects that matter more academically.

2. **A)** Organic food is worth the extra cost.
   B) The health benefits of organic food are often smaller than people assume.

3. **A)** Restaurants should be required to clearly list common allergies in every dish.
   B) Listing every possible allergen makes menus complicated and harder to read.

4. **A)** Eating out regularly is a normal and enjoyable part of modern life.
   B) Cooking at home is usually healthier and cheaper than eating out.

9 Discussion Prompts

1. What is one recipe you know how to cook well?

2. Do you think you eat a balanced diet? Why or why not?

3. Would you rather eat out or cook at home? Why?

4. Have you or anyone you know ever had a food allergy? What happened?

10 Context Passage

A university student once lived almost entirely on cheap processed snacks, telling himself he would start eating properly once exams were over. His appetite for real food seemed to disappear along with his energy, and after months of takeaway meals, even simple cooking felt impossible.

During the holidays, his grandmother handed him a worn recipe book and asked him to help cook dinner every night for a week. At first he just watched, but by the third night he was chopping vegetables and reading ingredient labels without being asked. He didn't become a chef overnight, and he still eats out more than he probably should. But he learned that a balanced meal, cooked from real ingredients, didn't have to be complicated — it just had to actually happen.

> **TRIVIA** — The earliest known written recipes date back to around 1730 BC, recorded on clay cuneiform tablets in ancient Mesopotamia.

HOW TO PLAY

Read a definition aloud without saying the word it matches. The first student to correctly call out the matching unit word scores a point. First student to 5 points wins.

8 Debate Toolkit

A. Functional Language for Debating

Function	Phrase	Topic Example
Adding a point	*On top of that…*	On top of that, small gradual changes often last longer than sudden ones.
Agreeing	*I'd support that view because…*	I'd support that view because staying flexible helps people adapt to almost any obstacle.
Asking for an opinion	*What's your take on…?*	What's your take on how quickly technology is changing our daily lives?
Concluding	*To wrap up…*	To wrap up, real progress usually comes from steady momentum, not one dramatic revolution.
Disagreeing	*I'm not convinced…*	I'm not convinced — some systems really do need a sudden revolution, not a slow transition.
Giving a reason	*The main reason is…*	The main reason is that people who resist change often fall behind those who adapt.
Giving an example	*Look at how…*	Look at how one small milestone can build the momentum for much bigger change.
Giving an opinion	*In my view…*	In my view, every generation has to modernise the ideas it inherits from the last one.

B. Argument & Counter

Pick a position, then argue against it using the language above.

1. **A)** Fast, dramatic change is usually more effective than slow, gradual change.
   B) Gradual change is easier for people to adapt to and is more likely to last.

2. **A)** Schools should modernise constantly to keep up with new technology.
   B) Constantly changing methods can be an obstacle to students who need stability to learn.

3. **A)** People who resist change usually end up worse off in the long run.
   B) Some traditions are worth protecting, even if that means resisting outside pressure to change.

4. **A)** A single strong leader can transform an organisation faster than a slow group process.
   B) Real, lasting change needs everyone involved, not just one person at the top.

9 Discussion Prompts

1. What is one big change you have had to adapt to in your own life?

2. Do you prefer gradual change or sudden, dramatic change? Why?

3. What do you think has been the biggest technological revolution of your lifetime?

4. What is one obstacle you have overcome to reach an important milestone?

10 Context Passage

A small family bookshop had sold the same kinds of books, in the same way, for nearly thirty years. When a large online store opened nearby, the owners resisted every suggestion to change, insisting that their loyal customers would always give way to convenience elsewhere but never truly leave.

Within two years, sales had dropped so much that closing seemed like the only obstacle-free option left. Rather than give up, the youngest member of the family convinced her parents to adjust, gradually adding a small café, hosting local author events, and finally building a simple website. It wasn't a revolution overnight — the changes were slow and often uncomfortable — but the shop began to catch on with a new generation of customers who wanted exactly the community feeling a big website could never offer. The shop didn't just survive the transition. It became proof that even the most traditional business can evolve without losing what made it special in the first place.

TRIVIA — ChatGPT became the fastest-growing consumer app in history, reaching 100 million users within about two months of its launch — a pace it took TikTok nine months and Instagram two and a half years to match.

11 Quick Practice

Two exercises, five minutes each.

A. Odd One Out — circle the word that doesn't belong, and be ready to explain why.

1. transform adapt evolve obstacle
2. revolution transition shift milestone
3. gradual sudden pace momentum
4. adjust modernise flexible revolution
5. flexible adjust adapt rigid

B. Transformation — rewrite each sentence using the word in capitals in a different form, keeping the same meaning.

1. The company changed its methods to suit the new market. (ADAPT)

2. Over millions of years, the species slowly developed new features. (EVOLVE)

3. The old factory started using more recent equipment and methods. (MODERNISE)

4. The small shop completely changed into a large, successful business. (TRANSFORM)

5. The country slowly moved from one type of government to another. (TRANSITION)

NON-NEGOTIABLES

By the end of this unit, these five should be automatic — no hesitation, no translating in your head: **adapt**, **evolve**, **gradual**, **milestone**, **transform**.

If any of these still feel unfamiliar, go back through the unit before moving on.
